

## **Sprint 2 Plan**

Product: freeBay

Team: team LE

Completion: November 1st

Revision No: 1

Revision Date: October 21st

Goal: To implement camera functionality into our mobile application and interface our UI with Google Vision API.

### **User Story 1**

As a user, I would like to access my camera from the mobile application, so I can take pictures of objects to give away.

Task 1: Implement camera usage into UI (5 points)

Task 2: Ability to scrap picture and take another if necessary (3 points)

### **User Story 2**

As a user, I want my picture to be processed efficiently, so I don't have to create the ad myself.

Task 1: Interface Google Vision API into application (10 points)

Task 2: Be able to make manual ads if needed (5 points)

### **Team Roles**

Ken: Product Owner, Developer

Andy: Developer

Dan: Developer
